Thomas Dupic

PhD

121 avenue d'Italie
75013 Paris
06 52 39 85 60
thomas.dupic@normalesup.org

Research Experience

2020-present **Post-doctoral student**, *Desai Lab (Harvard, USA), with Michael Desai*, Antibodies Evolution, Experimental and computational study of the affinity maturation landscape.

2018-2020 **Post-doctoral student**, *LPENS (ENS, France), in the group of Aleksandra Walczak and Thierry Mora*, structure and generation of the immune repertoire, relationship and interactions between the two polymer chains composing the T-cell receptor.

2015-2018 **Doctoral student**, *LPTHE (UPMC, France) supervised by Yacine Ikhlef and Benoît Estienne*, loop models and conformal field theories, study of a particular class of two-dimensional polymer models at criticality, entanglement entropy in critical non-unitary systems.

2015 **Internship at the LPTHE (UPMC)**, *with B. Estienne and Y. Ikhlef.*

2014 **Internship at the LPS (ENS), ABCD group**, *with J-F. Allemand*, Optical microscopy, tracking of a magnetic bead through diffraction patterns, Building of an optical setup .

2013 **Internship at the disordered system group in King's College London**, *with I.P. Castillo*, Eigenvalues of product of random matrices ; behaviour of vicious brownian walkers.

2012 **Internship at the laboratory Kastler Brossel**, *non-destructive quantum measurement : photons and atoms in cavity with M.Brune and P. Rouchon.*

Education

2013 **Master ICFP, Theoretical Physics**.

2012 **Master ICFP**.

2011 **Bachelors of Science in Mathematics and in Physics**.

2010-2014 **École normale supérieure (ENS, Paris)**.

2009-2010 **Classe Préparatoire (Nantes)**.

2009 **A-levels with First Class Honors**.

Competences

Computers **Python, C/C++, Unix, Mathematica, R**, *Data analysis, statistics, image analysis, optimization (LP, MIP), ...*

Languages **French (primary), English (fluent), Spanish (intermediate)**.

Teaching Experience

2015-2018 **UPMC**, *Teaching assistant (theoretical and practical), electromagnetism and optics* .

2013 **Lycée Henri IV**, *Oral examiner in classe préparatoire.*

Conferences

August 2018 **IPols 2018 (Physics of living systems)**, *Genesis of the $\alpha - \beta$ T-cell receptor.*

June 2016 **ICFT 2016 (UK Meeting on Integrable and Conformal Field Theory)**, *Relation between fully packed loop models and $\mathcal{W}_3$.*

2015-2018 **Organizer of the PhD seminars at the LPTHE**.
